### **CEMEX USA 2019 Safety Week Highlights Ongoing Dedication to Zero4Life**

CEMEX USA continued its dedication to improving workplace safety and employee health by starting the new year with Safety Week 2019, an annual company-wide initiative focused on achieving Zero4Life at its hundreds of facilities across the United States.

To begin the annual event, operations at CEMEX USA plants and facilities stopped for 60-90 minutes on Monday, January 7, so employees could participate in safety stand downs. During the stand downs, employees reviewed safety initiatives from 2018 and discussed potential improvements. The stand downs each year are intended to help workers refocus and recommit to working safely.

“At CEMEX, our commitment to safety is rooted in everything we do, every single day,” said CEMEX USA President Ignacio Madridejos. “We are relentless in our goal to achieve Zero4Life— zero recordable injuries, job-related illnesses, preventable vehicle accidents and environmental events. Safety is everyone’s responsibility, and Safety Week encourages all our employees to take action to make our work environments safer.”
